

# TOUR TALK TT 200 TOUR GUIDE SYSTEM

The Tourtalk TT 200 is a full-duplex two-way communication system that allows group leaders and group members to fully communicate with each other during a tour. The system allows the tour group to talk to and be heard by each other; making it more convenient for visitor tours with question and answer sessions or interviews, meetings on the shop floor, staff training and many other applications.

The Tourtalk tour guide system reduces frustration and confusion for your guests and stops you straining your voice. No longer do you have to compete with noise or distance to be understood. Ensure you are clearly heard on your next tour and provide a professional experience!

# TT 200-T Transmitter

The digital Tourtalk TT 200-T is a transmitter and receiver in a compact, lightweight, simple to use unit enabling both one-way and two-way communication between group leaders and the tour group.

Both the transmitter and receiver are supplied with a belt-clip and lanyard for hands-free use.

Internal mic and socket to connect earphone, headphone or headset

# TT 200-R Receiver

Signal/Status indicator

Volume wheel

Talk back button

Programmable OLED screen

Alarm release button

Single-earphone

The digital Tourtalk TT 200-R receiver has a talk back function to enable the user to speak back to the tour guide and tour group, when permitted.

A range of headsets are available to suit any environment from a quiet museum to a noisy factory.

The TT 200 system has three communication modes-

## Guiding Mode

The group leader (using a TT 200-T) can freely speak to the tour group. Any group member (using a TT 200-R) can talk back only when the group leader permits, enabling them to maintain control of the proceedings.

## Teaching Mode

The group leader (using a TT 200-T) and assistant (also using a TT 200-T) can freely speak to the tour group. Any group member (using a TT 200-R) can talk back only when the assistant releases their talk right. The group leader can always participate.

## Discussion Mode

All presenters (using TT 200-T) can participate in the discussion. All group members (using TT 200-R) can listen only.

# Chargers

Chargers are available in 2, 5, 25 and 50-slot versions.

# Features

**One-way and two-way communication**

**3 Operation modes to suit any tour**
