

TOURTALK

LANGUAGE INTERPRETATION SYSTEMS

A Tourtalk language interpretation system can be set-up within minutes of arriving at a venue.

The system can accommodate up to twelve different interpreters (languages).

As it is wireless, it requires no installation and can be used indoors and outdoors.

The Tourtalk TT 40-SI23M is a complete language interpretation system comprising 2 transmitters with headband microphones (for the interpreters), 23 receivers with earphones (for the delegates) and a charger transport case.

Mobile Interpretation for Foreign Guests

Multi-Language Conferences

How it works

The Transmitters

The transmitters are set on different channels. Each feature an integrated microphone, microphone socket (to connect the headband microphone), and microphone mute 'cough' switch. An aux-in socket to enable the connection of a interpreters desk is also provided.

The interpreters can speak at a comfortable level or even whisper, without the need of a translation booth.

The Receivers

The receivers feature a headphone socket to connect the single earphone. The delegates choose the interpretation they require by selecting the corresponding channel, and adjust their own volume to a comfortable level.

A wide range of accessories are available for the Tourtalk system to suit many applications. For more information please visit the website.

Tourtalk TT 40 systems are also used for:

- **Guided Tours**
- **Hearing Support**
- **Audio Description**
- **Command Training**
- **Silent Conferences**

Features include:

- Durable and very easy to use
- Lightweight design - only 75 grams per unit
- 40 Licence-free channels with up to 12 groups
- No limit to the amount of receivers per group
- Transmitter range of up to 120 metres
- Lockable group channel selector for reliability
- Lanyard and belt clip for hands-free operation
- Completely wireless so no installation is required
