

TOURTALK

LANGUAGE INTERPRETATION SYSTEMS

A Tourtalk language interpretation system can be set-up within minutes of arriving at a venue.

The system can accommodate up to twelve different interpreters (languages).

As it is wireless, it requires no installation and can be used indoors and outdoors.

The Tourtalk TT 40-SI24M is a complete language interpretation system comprising 1 transmitter with headband microphone (for the interpreter), 24 receivers with earphones (for the delegates) and a charger transport case.

Mobile Interpretation for Foreign Guests

Multi-Language Conferences

How it works

The Transmitter

The transmitter features an integrated microphone, microphone socket (to connect the headband microphone), and microphone mute 'cough' switch. An aux-in socket to enable the connection of a interpreters desk is also provided.

The interpreter can speak at a comfortable level or even whisper, without the need of a translation booth.

The Receivers

The receivers feature a headphone socket to connect the single earphone. The delegates can adjust their own volume to a comfortable level.

A wide range of accessories are available for the Tourtalk system to suit many applications. For more information please visit the website.

Tourtalk TT 40 systems are also used for:

- **Guided Tours**
- **Hearing Support**
- **Audio Description**
- **Command Training**
- **Silent Conferences**

Features include:

- Durable and very easy to use
- Lightweight design - only 75 grams per unit
- 40 Licence-free channels with up to 12 groups
- No limit to the amount of receivers per group
- Transmitter range of up to 120 metres
- Lockable group channel selector for reliability
- Lanyard and belt clip for hands-free operation
- Completely wireless so no installation is required
